An uninterruptible power supply (UPS) offers guaranteed power protection for connected electronics. When power is interrupted, or fluctuates outside safe levels, a UPS will instantly provide clean battery backup power and surge protection for plugged-in, sensitive equipment.

Uninterruptible Power Supply (UPS) Systems are units designed to supply electrical power to external devices for a few minutes during a power outage, allowing either the device to safely shut down or power to be restored. For use at home, industrial or network applications, UPS systems can provide power either through
