Why should you choose a mini UPS module with integrated power supply?

The MINI UPS modules with integrated power supply are particularly space-saving: UPS module and power supply in one housing. Only one energy storage is required to complete the UPS system. Energy storage with lead AGM technology enables buffer times of up to 2 hours under nominal load for output voltages of 24 V DC or 12 V DC.

What is the power rating of a 12V UPS?

The 12V UPS uses an off-the-shelf, standard transformer that is available at all leading security equipment suppliers. The transformer output should be between 16 to 17 V AC, and rated up to 3 amps. I always prefer to over design, so I will design this 2A UPS so that it is rated for a maximum of 3A.
