What is a solar grid tie inverter?

On grid inverters are commonly used in applications where direct current voltage sources are connected to the grid, such as solar panels and small wind turbines. The output voltage frequency of the solar grid tie inverter needs to be same as the grid frequency (50 Hz or 60 Hz).

What is frequency inverter?

The frequency is directly related to the rotary speed of the motor, in other words, the faster the frequency, the faster the rotary speed. If the motor is no need to run at full speed, the frequency inverter can be used to reduce frequency and voltage to meet the requirement of motor load.

How frequency inverter can reduce energy consumption?

Electric motor systems account for more than 65% of the power consumed in the industry, frequency inverter can reduce equipment energy consumption by up to 70% by it optimizing motor control system.
