

What percentage of Armenia's Energy is renewable?

Renewable energy resources, including hydro, represented 7.1% of Armenia's energy mix in 2020. Almost one-third of the country's electricity generation (30% in 2021) came from renewable sources. Forming the foundation of Armenia's renewable energy system as of 6 January 2022 were 189 small, private HPPs (under 30 MW), mostly constructed since 2007.

How much energy does Armenia import?

Oil fuels need to be imported. Natural gas represents the largest - 76.3% share of Armenia's energy imports (2.45 mln toe), followed by oil products 22.6% (0.73 mln toe). Armenia exports electricity in 2022, of which by 0.79 nuclear power plant (31.0%), natural gas fired thermal power plants (42.2%), hydro power plants (21.1%) and wind and

What are the issues affecting energy supply in Armenia?

However, issues related to energy supply, electricity market liberalization, and administration remain. Armenia has limited energy resources and can meet only a fraction of the total demand for energy from domestic resources. Armenia does not have oil or natural gas reserves and is thus highly dependent on imported energy resources.

What is Armenia's Energy Policy?

Diversifying energy sources and reducing import dependencies are key Armenian policy priorities. With no significant domestic fossil fuel reserves, hydroelectric power is the primary local energy source. Yerevan aims to expand renewables to meet decarbonization targets and decrease import reliance.

Does Armenia have energy resources?

Armenia has limited energy resources and can meet only a fraction of the total demand for energy from domestic resources. Armenia does not have oil or natural gas reserves and is thus highly dependent on imported energy resources. It imports oil and petroleum products from Russia, Georgia, Iran, and Europe.

Does Armenia have solar energy?

Armenia has significant solar energy potential: average annual solar energy flow per square metre of horizontal surface is 1 720 kWh (the European average is 1 000 kWh), and one-quarter of the country's territory is endowed with solar energy resources of 1 850 kWh/m² per year. Solar thermal energy is therefore developing rapidly in Armenia.

Although Armenia does not produce any fossil fuels, the country manages to cover 27.0% of its energy demand with domestic energy production: nuclear energy, hydro energy, ...
