

Boston Smart Solar Systems

What is the Massachusetts smart solar program?

Through the MA SMART solar program, the state's three investor-owned utilities compensate solar owners for the electricity their systems produce. The program is one of several solar incentives available in Massachusetts that reduces the cost -- and increases the savings -- of installing a home solar system.

Is solar a good option for Boston homes and businesses?

"Going solar is increasingly an attractive option for Boston homes and businesses," said Mayor Walsh. "With solar prices plummeting, and Massachusetts having some of the best incentives in the country, this map will introduce the benefits of solar to a broader audience."

How many solar installations does smart have in Massachusetts?

As we said earlier, the SMART program has a capacity of 3,200 MW of solar installations. This capacity is divided among the three investor-owned electric distribution companies in Massachusetts: The capacity amount assigned to each utility company is based on how many customers are in the utility's service territory.

What is the solar Massachusetts renewable target program?

A long-term, sustainable solar incentive program to promote cost-effective solar development in the Commonwealth. DOER created the Solar Massachusetts Renewable Target (SMART) Program to create a long-term sustainable solar incentive program that promotes cost-effective solar development in the Commonwealth.
