Since you already solved the clue Supply with power which had the answer ELECTRIFY, you can simply go back at the main post to check the other daily crossword clues.

Parts of a Power Supply. Ideally, a DC Power Supply Unit (commonly called a PSU) deriving power from the AC mains (line) supply performs a number of tasks: 1. It changes (in most cases reduces) the level of supply to a value suitable for driving the load circuit. 2. It produces a DC supply from the mains (or line) supply AC sine wave. 3.

Key components of a power supply include transformers, rectifiers, filters, voltage regulators, and protection circuits. Understanding the functions and components of power supplies is crucial for designing and operating electronic systems effectively.
