

Container generator set shipping

Who needs a containerised generator set?

Whether you are a ship manager in need of temporary additional or replacement power, or a supplier to the maritime industry renting out containerised generator sets, we recommend you acquaint yourself with the content of the new Class Guideline to ensure a smooth installation of a containerised generator set.

What is a container genset?

Container gensets mitigate this risk by providing a consistent power supply, even in remote or challenging locations. For example, frozen shipping containers rely heavily on these gensets to maintain ultra-low temperatures during transit.

What is a genset on a reefer container?

The Genset, also known as a Clip On Generator, is a handy unit that clips onto the chassis of a Reefer Container to provide power when an external source of power is not available, such as during transport. Our Gensets run on diesel, gasoline or gas. Disc type radial fan for cooling: Sealed large diameter rear bearing.

What are the different types of containerized diesel generator sets?

The containerized diesel generator sets produced by Dingbo Electric Power are divided into standard and silent types, using a standard container structure box with built-in diesel generator sets and dedicated complete sets of equipment and accessories.

Why do shipping containers use gensets?

For example, frozen shipping containers rely heavily on these gensets to maintain ultra-low temperatures during transit. This ensures that goods arrive at their destination in perfect condition, meeting both regulatory standards and customer expectations. What Are the Benefits of Gensets?

What is a Thermo King generator set?

Thermo King's generator set (genset) range provides the vital, independent power supply needed to maintain the cold chain in global container refrigeration. They provide dependable power after your marine containers are unloaded and unplugged from the ship, ready to continue their journey on the road or waiting for further transport on shore.

Fuel and electricity are combined because the reefer container is transported on different ways. During transport overseas, on container vessels, the genset is usually powered by the ship's electrical power. When the generator set is used on a cargo truck, it's usually powered by diesel because there is no electrical power supply available.

Containerised generators offer increased levels of weather protection for the generator unit in harsh environments. For example they're ideal for exposed locations, marine environment, oil and gas applications. As they're enclosed in a secure container that is usually a clean environment they often require less maintenance.

Yes, shipping containers can be fully modified to create custom generator and compressor enclosures. Our team specialises in converting containers into secure, ventilated, and sound-attenuated environments for housing power and air equipment.
