How many types of solar inverters are there?

There are 5 different kinds of solar inverters, all with varying benefits: A battery inverter is the best option if you are needing to retrospectively fit a battery into your solar system, or are wanting to keep your battery separate from your solar panels and run through a different inverter.

What is a hybrid inverter?

Hybrid inverters, otherwise known as 'multi-mode inverters', are pretty uncommon in Australia and allow you to connect batteries to your solar system.

What is a string inverter?

String inverters are the most common inverter option for residential use, and there is usually 1 string inverter per solar installation. They are known as 'string inverters' due to the fact that a string of solar panels is connected to them. The solar inverter is a device that can convert 12V/24V DC power into 220V AC current.

How does a battery inverter work?

A battery inverter converts your battery power into 230V AC and feeds it into your switchboard (instead of grid power) wherever possible. A central inverter is huge and is used for systems requiring hundreds of kilowatts (or even sometimes megawatts) of volume.
