The large-scale development of energy storage began around 2000. From 2000 to 2010, energy storage technology was developed in the laboratory. Electrochemical energy storage is the focus of research in this period. From 2011 to 2015, energy storage technology gradually matured and entered the demonstration application stage.

The same goes for driving an EV. I don't know if it's just me, but the general feeling is that most EVs tend to require a good read at the user manual first before setting off.
