

Floor mounted energy storage liquid cooling 60kW

What is EMW series air cooled chiller for energy storage containers?

EMW series air cooled chiller for energy storage containers is mainly developed for container battery cooling in the energy storage industry. It is suitable for cooling and heating energy storage batteries, as well as other temperature-sensitive equipment.

Which EMW is suitable for cooling and heating energy storage batteries?

It is suitable for cooling and heating energy storage batteries, as well as other temperature-sensitive equipment. This model, with functions including host computer communication and alarm, is highly reliable and easy to install, negating the need for complicated debugging. Product model: EMW150, EMW200, EMW400, EMW450, EMW600.

Why should you choose a 440 kW unit?

Units in 440kW capacities significantly reduce the cost of deployment and maintenance and improve energy efficiency through an optimized chilled water coil design that can utilize higher entering water temperature (EWT). Multiple connection options provide greater flexibility during installation and commissioning.
