Guinea has a flat tariff of 10 percent on most imports. However, some "privileged regimes" (see Establishing an Office), public institutions, and donor organizations can receive exemptions. Privileged regimes have an exemption on import duties for machinery and equipment for use on investment projects and a six percent duty on raw materials.

The electricity sub-sector in Guinea-Bissau remains one of the least efficient in West Africa. Serious challenges faced include: (i) discrepancies between supply and demand; (ii) waste resulting from obsolete distribution networks, with a loss rate of almost 47%; (iii) low investments; (iv) the poor commercial and financial performance of the national power utility; ...

A portable power station, also known as a portable battery pack or a portable power supply, is a self-contained unit that stores electrical energy and can be used to power electronic devices. Unlike a traditional generator, which uses a combustion engine to produce electricity, a porta

Investments are also being made in other electrical power transmission and distribution segments to reduce technical and non-technical losses and improve the electricity access rate (36% in 2020) and the financial equilibrium of the sector.
