What is a smart string inverter?

Huawei's smart string inverter SUN5000 series combines inverters and optimizers for a 30% higher yield and 30% more installation area. The system offers AFCI intelligent arc protection, RSD rapid shutdown, and TODD over-temperature detection for all-around safety. It's easy to install and comes with a 15-year warranty for peace of mind.

Why should you choose Huawei solar panels?

Thanks to Huawei's innovative optimizing system, each PV module operates independently at its best, minimizing power loss even in shaded areas. Say goodbye to mismatches and hello to unparalleled energy efficiency. Making full use of your rooftop by putting solar panels on every side.

Why is my sun5000 series inverter NOT working?

*2. Any DC input voltage beyond the operating voltage range may result in inverter improper operating.
*3. The SUN5000 Series Inverters must be fully equipped with optimizers, otherwise the system will report errors and can not work. Disclaimer: The preceding values are measured by an internal laboratory of Huawei in a specific environment.
