Which Inverter should I Choose?

Select an inverter with power output LARGER than the total load power required EX. if total load estimated = 4000w, we recommend using a 5KW inverter. What system voltage do I select? Once a suitable inverter model is determined, it will have a fixed corresponding DC voltage (or system voltage) in either 12V, 24V or 48VDC.

Which inverter can take DC & AC input?

For On-Grid Systems, generally the DC capacity and AC capacity (of inverter) are very much similar. Hence here we shall look for inverter which can take min. 4.225kWp (DC) input. Looking at datasheet, 4.0kW inverter (Model: KSY 4kW) has "Max Peak DC Input Power" of 4.8kWp and hence that inverter serves the purpose.

What voltage should an inverter output be?

The inverter output voltage should comply to the standard voltage level and has to be within 228V to 252 V. For U.S, the accepted voltage level is 110V. The inverter output voltage needs to be within 98 V to 122V. The output voltage should be in the range as mentioned above in order for it to be grid or appliance compatible.

What is a solar inverter power rating?

The inverter power rating signifies the total wattage of loads it can support. The power generated from the string of solar panels which is given to the inverter is called Maximum PV input power. Maximum PV input power must never be exceeded by the power output from the combined panels. Else the inverter runs inefficiently.

How to select an inverter?

Before selecting an inverter, first the motor should be chosen. In selecting the motor, first calculate the load inertia for the applications, and then calculate the required capacity and torque. This method of calculation helps select a motor by calculating the output (W) required by the motor to maintain its regular rotations.

What questions should I consider before selecting an inverter?

Before selecting an inverter, please be sure to consider these important questions first. What output voltage do I need? 220-240V Single Phase: Europe, Africa, Australia, the Middle East, and many parts of Asia.
