I have a pure sine wave inverter, it charges a 12V battery and converts 12V from battery to 220V during a power cut. Since it can output 12V to charge the battery at quite a high current I was wondering if I could use it as a 12V power supply. I connected the 12V output to a multimeter and it seems to be jumping from 6.xx volts to 13.xx.
