Why is KC certification important for lithium batteries?

The KC Certification is crucial for lithium batteries. It ensures safety and quality in South Korea. This article will explain what KC Certification is and why it matters. We'll also guide you on how to get this certification and compare it with others. Part 1. What is KC certification?

What is the new standard for lithium battery certification in Korea?

Recently, the relevant departments in Korea finally announced the specific implementation instructions for the new standard for lithium battery certification in Korea, and the standard transitioned from the well-known KC 62133:2018 to KC 62133:2019.

Can you legally sell lithium batteries in South Korea?

In South Korea, selling lithium batteries legally requires KC Certification. With this certification, companies can legally sell their batteries in the market. This ensures that all batteries available to consumers meet high standards. Builds Consumer Trust

What are the performance standards for lithium batteries?

Performance Standards: Batteries must perform reliably under everyday use. This includes tests for capacity, charging cycles, and durability. These requirements help protect consumers and the environment. They ensure that lithium batteries sold in South Korea are safe and high-quality.

What is a KC mark on a battery?

Award of KC Mark: Certification authority grants the KC mark to certified batteries, which manufacturers must display on the product and packaging. Guidelines for Proper Labeling and Documentation to Ensure Compliance: Display KC Mark: Display the KC mark on the battery and packaging.

What is the difference between kc62133 2015 & 2019?

2.2 lithium battery requirements for mobile phones, tablets and laptops are different from kc62133:2015. Compared with kc62133:2015, the new kc62133:2019 standard has added three test requirements: -- 2 test items [for vibration and mechanical impact of battery packs]

Test: If the end products of lithium batteries are mobile phones, tablets and laptops, the 2019 version requires the following three tests: 1) Vibration test (battery pack): Refer to the sixth edition of the UN38.3 report for this test. 2) Mechanical shock test (battery pack): Refer to the sixth edition of the UN38.8 report for this test.

2.1 except for lithium batteries for mobile phones, tablets and laptops, the requirements of kc62133:2019 are equivalent to those of kc62133:2015, and kc62133:2015 standard is completely corresponding to iec62133:2012 standard. 2.2 the requirements of lithium
