Not yet. The current technology maximizes solar panels at around 23% efficiency. This makes 400 and 500w solar panels possible, but not 1000w panels. However, 500w solar panels were unthinkable just five years ago. Solar technology moves at breakneck speeds, so be patient for another five years if you want 1000w solar panels.

Just because I am building a 2000W system doesn't mean I need 2000W of solar panels, Sure that would recharge my system quicker but I am already spending double what I had planned on to build this. Still waiting to see about batteries. I of course will need two 12V in series for 24V system. More brands of lithium coming available all the time.
