Rooftop Solar Be an independent power producer. Solar energy is present everywhere in abundance, and is more than enough to illuminate the whole earth. At Vivaan Solar, we assess your energy requirement, identify system components needed and integrate the whole components to generate the optimum output.

A solar rooftop system works on the concept of conversion of sunlight into electricity. The phenomenon is known as the photovoltaic effect. When sunlight falls on the PV cells in a solar panel, the sunlight is converted into electricity. The generated power is DC current. An AC combiner box is used to convert that DC power into usable AC power.
