

New outdoor power supply in North Macedonia

How much solar power does North Macedonia have?

Solar power Built on a former lignite open pit mining site, North Macedonia's Oslomej solar park will have an installed capacity of 120 MW when fully completed. © Ciril Jazbec

What's happening in North Macedonia's energy sector?

North Macedonia's energy sector remains in a transition stage characterised by limited private sector participation, insufficient and aging infrastructure, high reliance on fossil fuels - especially coal and lignite, low energy efficiency, often low energy prices and fragmented markets with limited cross-border trade.

Does North Macedonia have a wind park?

The WBIF has successfully piloted the first renewables scheme in North Macedonia. The first phase of the wind park was completed in 2014 and currently generates 100 GWh per year, providing renewable energy for more than 16,000 households in the Bogdanci region.

Is North Macedonia a 'flagship investment' in the Western Balkans?

Both projects have been identified as Flagship investments under the Economic and Investment Plan for the Western Balkans. North Macedonia's efforts to decarbonise the energy sector received another boost with the signing of a grant agreement on 18 March 2024 to increase the capacity of Bogdanci Wind Park.

Should North Macedonia accelerate the transition to renewables?

Like others in the region, North Macedonia must balance its need to rapidly accelerate the transition to renewables to secure its energy future with the need to ensure that future is one where both the country's nature and people thrive.

Does North Macedonia need a coal phase-out?

Even though the country has historically been dependent on lignite coal mining for around 30% and gas imports for an additional 15% of its electricity production, it has nonetheless set very ambitious goals for decarbonization. As part of the Powering Past Coal Alliance, North Macedonia has committed to a coal phase-out by 2027.
