The first consideration when selecting a portable battery backup power system is its capacity and power output. Capacity is measured in watt-hours (Wh) or ampere-hours (Ah) and indicates the amount of energy the battery can store. Determine your power needs by assessing the devices you'll be powering and their energy consumption.

The EcoFlow portable power station features 8 outlets that cater to a wide range of power needs, including wall-style, USB, and DC outputs. This allows users to simultaneously charge and power multiple devices, such as smartphones, laptops, cameras, and portable refrigerators, making it a versatile and convenient power source.
