

Outdoor power box distribution cabinet

What is a power distribution cabinet?

A power distribution cabinet is the general name for the motor control center. It is the final equipment in the power distribution system and is responsible for distributing electrical power to various loads.

What is a power distribution box?

The power distribution box allows different configurations of the battery packs to be connected in series or parallel. The PDU also contains a master BMS unit (MMU) which communicates with the Pack BMS units. If you have any questions, we will be happy to advise you and help you from the idea to the finished battery.

What is a Longxing outdoor power cabinet?

LongXing outdoor power cabinet provides flexible size options, offers the ideal enclosure solution to build the whole base station inside.

What is a cabinet system & how does it work?

The cabinets system supports network equipment, backup batteries, and power systems in a range of severe environmental conditions. 2 levels (Normal & Master) safety key mechanism completes the protection of installed equipment. | Thickness of steel: front doors: 2.0mm, roof: 2.5mm aluminum, other parts: 1.5mm.

Description: Multi-function card power distribution cabinet adopts "step-by-step delayed power on" to avoid the instantaneous impact of large loads on the power grid, effectively protect the electronic components of the display body and prolong the service life of the display, with the use of multi-function card to improve the overall performance of the LED system.
