

Outdoor power demand in Argentina

Why is electricity consumption so high in Argentina?

Per capita consumption in Argentina (1.7 toe/cap in 2023) is the third highest in South America after Chile and Guyana. These high levels are mainly due to space heating needs. Electricity demand per capita is around 2 700 kWh/cap (2023).

How much energy does Argentina need?

Argentina needed to import 2,441 MW from countries in the region to cover the record-breaking energy demand on Monday March 13 last year at 3:53 pm, the previous record. That day, Brazil contributed 1,866 MW. The demand from the local generation park was at its peak. The thermal sector still has 7,448 MW unavailable.

What is the main source of electricity in Argentina?

Despite this decline, thermal power generation remained as the main source to meet the electricity demand in Argentina. Oil, natural gas, and coal are the thermal power sources used for power generation in the country.

How many GWh of electricity did Argentina generate in 2018?

In 2018, electricity generation through conventional thermal power sources reached 87,725 GWh, representing a decline of almost 2.6%, compared to the 2016 levels. Despite this decline, thermal power generation remained as the main source to meet the electricity demand in Argentina.

Will RenovAr boost the power market in Argentina?

Therefore, the government's focus on increasing the renewable energy share in the energy mix of the country to 20% by 2020 is expected to be bolstered by RenovAr program, in turn driving the power market in the country. The Argentina power market is fragmented.

Who controls the electricity price in Argentina?

In the case of other companies (provincial or cooperatives), the electricity price is controlled by supervisory administrations. Per capita consumption in Argentina (1.7 toe/cap in 2023) is the third highest in South America after Chile and Guyana. These high levels are mainly due to space heating needs.

Data is now available through the .Stat Data Explorer, which also allows users to export data in Excel and CSV formats. Average daily power demand in Argentina, January ...

Argentina Brazil China Egypt India Indonesia Kenya Morocco Senegal Singapore South Africa Thailand Ukraine The IEA examines the full spectrum of energy issues including oil, gas and coal supply and demand,

Outdoor power demand in Argentina

renewable energy technologies, electricity markets, energy efficiency, access to energy, demand side management and much more. Through its ...

Increased power cuts and blackouts in Argentina impact the industry, economy, social and environmental conditions. There are several factors that drive the increase in power cuts including aging infrastructure, ...

Outdoor Apparel Market Synopsis. Outdoor Apparel Market Size Was Valued at USD 35.2 Billion in 2023 and is Projected to Reach USD 66.37 Billion by 2032, Growing at a CAGR of 7.3 % From 2024-2032. Outdoor apparel refers to clothing designed specifically for outdoor activities and environments, such as hiking, camping, skiing, and climbing.

The Outdoor Equipment Market size was valued at USD 25.80 Billion in 2024 and the total Outdoor Equipment revenue is expected to grow at a CAGR of 3.6% from 2025 to 2032, reaching nearly USD 34.23 Billion. Outdoor Equipment Market Overview Outdoor power equipment contains a compact engine, small motors for outdoor services it includes brush cutters, edgers, ...

Average daily power demand in Argentina, January 2022 to March 2023 - Chart and data by the International Energy Agency.

o Argentina's total energy consumption was 3.45 quads in 2022, lower than the 3.57 quads consumed in 2012 (Figure 1). The reduction in energy consumption was curbed ... to changing demand, and the electricity network hasn't expanded to meet rising demand. Argentina is commissioning large projects in both the generation and

The Global Outdoor Power Equipment Market Size is expected to reach USD 42.34 Billion by 2033, at a CAGR of 3.28% during the forecast period 2023 to 2033.. Outdoor power equipment runs on smaller engines or small motors. The term "outdoor power equipment" means equipment that is specifically utilised for outdoor services.

Argentina needed to import 2,441 MW from countries in the region to cover the record-breaking energy demand on Monday March 13 last year at 3:53 pm, the previous ...

Argentina aims to increase the share of wind and solar to 20% of electricity production in 2025 and reduce GHG emissions by 21% in 2030 compared to its 2007 emission peak. According to its Long-Term Strategy, the ...

Outdoor Power Equipment Market is expected to grow at an exponential CAGR of 3.4% by Increasing need for the DIY approach in almost all households during forecast Period 2025- 2035. ... This surge in construction activities leads to a higher demand for outdoor power equipment such as compactors, chainsaws, and drills. ...

Outdoor power demand in Argentina

North America dominates the outdoor power equipment market due to the presence of leading manufacturers of outdoor power equipment and increase in residential applications within the region. Asia-Pacific is expected to witness significant growth during the forecast period of 2021 to 2028 because of the rise in residential and commercial sectors ...

Up until 2012 Argentina exported oil, however, due to the rapid growth of domestic demand, the country was forced to start importing oil, but in 2016 it resumed its exports (Fig. 2). ... As noted above, renewable energy in Argentina, excluding hydro power, does not have a significant share in energy production. The total production of ...

The Report Covers Argentina Power Market Trends and Companies and is segmented by Power Sector (Generation (Thermal, Hydropower, Nuclear, and Non-Hydroelectric Renewables) and ...

The energy sector - including supply and demand sectors such as transport and buildings - is the most relevant sector for Argentina's NDC (responsible for 53% of national ...

The global Outdoor Power Equipment market is forecasted to grow at a noteworthy CAGR of 5.71% between 2025 and 2033. By 2033, market size is expected to surge to USD 57.06 Billion, a substantial rise from the USD 34.62 Billion recorded in 2024.

Outdoor power equipment market is projected to reach \$41.1 billion by 2031, growing at a CAGR of 5.4% from 2022 to 2031. Increase in demand for power equipment in the gardening and landscaping industry has driven the market growth.

Explore Outdoor Power Equipment Market Regional Demand with our comprehensive analysis. Get insights on North America, Asia Pacific, Europe, and other key regions. Access country-level market data and understand market dynamics and growth potential across different regions.

Argentina: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity. For a number of countries, it ...

Outdoor Power Equipment Market Size 2025 And Growth Rate. The outdoor power equipment market size has grown marginally in recent years. It will grow from \$28.38 billion in 2024 to \$28.76 billion in 2025 at a compound annual growth rate (CAGR) of 1.3%. The growth in the historic period can be attributed to urbanization, landscaping and gardening, commercial landscaping ...

The Global Outdoor Power Equipment Market is estimated to be valued at USD 39.41 Bn in 2025 and is expected to reach USD 62.46 Bn by 2032, growing at a compound annual growth rate (CAGR) of 6.8% from 2025 to 2032. Outdoor power equipment includes lawn mowers, blowers, chainsaws, trimmers and other landscaping tools that are powered by small engines. brisk ...

Outdoor power demand in Argentina

Argentina COUNTRY INDICATORS AND SDGS TOTAL ENERGY SUPPLY (TES) Total energy supply in 2021 Renewable energy supply in 2021 37% 50% 3% 2% 8% Oil Gas Nuclear Coal + others Renewables 29% 18% 4% 49% ... that, if renewable power did not exist, fossil fuels would be used in its place to generate the same amount of power and using the same mix of ...

Power demand in Argentina has historically grown by 2-3% p.a. and it is highly correlated to GDP growth. Forecast electricity consumption in 2025 is estimated at 170 TWh of which 34 TWh (20%) must to be sourced from renewables, ...

While hydropower makes up the largest amount of electricity generated in Latin America overall, the power sector of Argentina mainly relies on fossil fuels. Natural gas is the ...

The global outdoor power equipment market size was estimated at USD 53.42 billion in 2024 and is projected to grow at a CAGR of 6.3% from 2025 to 2030. The market growth can be ascribed to the increasing demand for cordless ...
