A coulomb (like most units named after people, the name is written out in lowercase unless you're specifically referring to that person), is defined as one amp for one second: $1\text{A} \times 1\text{s} = 1\text{C}$. Because there are 3600 seconds in an hour, one amp hour equals 3600 coulombs: $1\text{Ah} = 3600\text{C}$ How does the LTC4150 Measure Coulombs? The LTC4150 has an output pin called interrupt, ...
