

Outdoor power supply that can be remotely controlled

Can a smart receptacle control two outlets?

While most smart receptacles allow for two devices to be plugged in, not all of them allow smart control over both outlets. My top pick, the Kasa Smart Plug KP200, supports both while the UltraPro only provides one smart outlet and one "always on" (AKA dumb!) outlet.

What is a master control power strip?

Master control: These power strips have a "master" outlet for a major device like a computer or television. When this is turned on, the power strip returns power to peripheral devices plugged into other outlets. When the device in the master outlet is turned off, the other outlets cut their power to reduce standby power.

What is a masterless power strip?

Masterless: These power strips use a similar but inverse concept: when no devices plugged into the power strip are drawing power, the whole power strip cuts off all outlets. Motion sensing: These power strips detect movement in a room to turn outlets on and turn outlets off after a set period without movement.

Do smart power strips come with a surge protector?

Certain smart power strips will come with a surge protector so that your electronics are safe in the event of a power surge. We do a deep dive into the voltage each product we consider can handle. The cord length of a smart power strip can make or break how well it works in any given room.

What can smart in-wall outlets with energy monitoring do?

Smart in-wall outlets with energy monitoring features can provide valuable insights into your home's electricity usage. These outlets, such as the Sinopac Smart Outlet, can help homeowners save energy and money in the long term by providing real-time data and usage patterns.

What devices can you automate with smart in-wall outlets?

They can be used to automate various devices in your home, like lamps, fans, or any plugged-in appliance. They typically have built-in Wi-Fi or other wireless communication protocols, such as Zigbee or Z-Wave, enabling them to connect to your home's smart network.
