

Prices of Solar Lighting Systems

How much do solar street lights cost?

When comparing the total costs of traditional and solar lighting, there appears to be a clear winner. Overall, solar street lights cost around \$4,800 over 5 years, while standard costs a steep \$8,800 because of trenching and installation costs. As before, this is the cost of one street light.

How much does a solar light cost?

These lights reside off the main power grid and can be installed in remote locations. Because of the advanced technology required for solar lights, they are more expensive, averaging about \$3000 per light. That includes the light fixture, the solar panel, controller, pole, and the smaller components that make up the light.

How much does it cost to repair a solar light?

While solar lights get repaired less frequently, the cost of each repair is higher. The battery of a solar light needs to be changed every 5-7 years. The cost of 2 batteries and labor for those changes averages around \$1000. This is only slightly higher than the cost of standard lights which is about \$800 for standard maintenance fees.

How much do Biling solar powered outdoor lights cost?

The price of Biling solar powered outdoor lights is \$59.99. Get it as soon as Fri, Jan 28 with FREE Shipping by Amazon.

How much does a street light cost?

The average cost of one light, including the lighting fixture, pole, and base, averages at \$2000. Not bad for the cost of one street light. Solar street lights utilize fixtures connected to a (typically) silicon-based solar panel to garner electricity through a process called the photovoltaic effect, which converts light into usable voltage.

Are solar lights better than traditional street lights?

While traditional lighting systems may have won some battles, solar lights win the war for street light costs. It's the combination of high-tech solar panels with energy-saving LED lights that propel these street lights far ahead of the competition.
