UPS equipment can be rebuilt to the extent necessary by disassembly and reassembly using new or reconditioned parts. Rebuilt UPS equipment is subject to the same requirements as new UPS equipment.

NOTE: If you have a camera power supply or similar which says "mA", this is milliamps, or  $\times 0.001A$ . If it says for example, 1,000mA, this is simply 1A. So a 12V / 1000mA power supply is simply 12VA. Once you have added all the "VA" together, you know the total power requirement for your system.
