

Solar Street Light HS

What is the HS code for solar street lights?

For solar street lights, the relevant HS code falls under 9405.40, which refers to "Electrical lighting or signaling equipment." Here's a breakdown of the classification: 9405- Represents "Lamps and lighting fittings, including searchlights and spotlights and parts thereof."

Why is accurate HS Code classification for solar street lights important?

Before we delve into why accurate HS code classification for solar street lights is important, let's clarify what HS codes are and how they function in international trade. HS codes, or Harmonized System codes, are a standardized numerical classification system used worldwide for identifying and categorizing traded goods.

Should solar street lights be subsidized by HS code 9405?

For example, if a country has a free trade agreement (FTA) with provisions for renewable energy products, solar street lights classified under HS code 9405.40 could benefit from reduced tariffs, making them more affordable and attractive to buyers in those regions.

How much does solar street light cost?

Average import price for solar street light under Sub Chapter 9405 was \$8.20. Please use filters at the bottom of the page to view and select unit type. You may also use the analysis page to view month wise price information. There are 644 exporters of solar street light. This information is derived from data obtained from US Customs Department.

What is a solar street light system?

A solar street light system is an ideal application for campus and village street lighting. Solar street light systems are commonly used for outdoor lighting, especially in areas where access to the electricity grid is limited or unreliable. Neosol offers various solar-powered products, including solar lanterns and solar water heaters. The solar lantern has found good acceptance in the market. Solar water pumps are another solar product designed to lift water for irrigation, horticulture farms, and gardens.

How do you classify solar street lights?

For instance: The United States classifies solar street lights under 9405.40.6000. China assigns them 9405.40.0000. India uses 9405.40.10. Understanding these codes and assigning the correct one to your products is essential.
