Does Barbados use solar panels?

Solar panels are seen more and more frequently across Barbados. Similar to the ubiquitous solar water heater on Barbadian rooftops, the Government of Barbados is fully committed to the idea of renewable energy and solar PV, thereby preparing the country for even more substantial growth in this sector.

Should you buy a solar PV system in Barbados?

One of the biggest, if not the biggest hurdle to further solar PV penetration in Barbados is the upfront cost of a system. When you think about the fact that the cost is essentially the prepayment of 25-30 years worth of electricity it makes sense that the price is "high". If you could purchase a ... Continue reading ->

What is the installed solar PV capacity in Barbados?

The total installed solar PV capacity in Barbados is about 22MW(12MW RER +10MW utility).

Do you supply & install inverter energy efficient air conditioning units?

As customer service is key to us, our team is sure to keep in touch with our valued customers after installation or servicing to ensure that all needs were met. We supply and Install inverter energy efficient air condition units which offer up to 65% savings on energy cost. We also supply and install standard type air condition units.

If you do not need the solar system to power all your home appliances temporarily, it is also a smart choice to consider using solar AC units. It will save on your electricity bill. Air conditioning seems to have become a necessity for modern households, accounting for 20%-30% of the total electricity bill. In summer or winter, you can use air conditioning to keep your home comfortable.
