

Latvia: Electricity generation within the Solar Energy market in Latvia is projected to reach 10.64m kWh in 2025. The solar energy market has grown significantly in recent years, driven by ...

NIB, Luminor Bank and NORD/LB have agreed to co-finance a 148 MWp solar farm in the Ventspils municipality. The project is developed by Stelo Orienta SIA, a subsidiary of ...

Development to date Latvia's energy system is largely based on renewable resources, primarily hydropower from the Daugava River, supplemented by wind, solar, and biomass. While natural gas imports cover energy shortages, the country aims to increase wind and solar energy capacity, with significant progress already made in 2022. Country is ...

The development of wind and solar projects will make an important contribution to Latvia's green transition and long-term energy security. As a leader in renewable energy, European Energy has a strong focus on sustainability and on the active involvement of local communities that is key to the expansion of renewable energy projects in Latvia ...

This autumn, the renewable energy company Sunly started work on three large solar park projects in Latvia, with a combined capacity reaching 225 MW. These projects will be capable of meeting the annual electricity consumption of over ...

This week, the construction of Latvia largest solar power plant so far is starting at Kalkune in Augsdaugava district, reports Latvian Radio. REplay; Latvian Television LTV; Latvian Radio LR; Sunday, April 20 ... There are eight such projects in total. It is our contribution to the promotion of Latvia's energy independence and, of course ...

HANDBOOK ON IMPLEMENTATION OF COMMUNITY RENEWABLE ENERGY PROJECTS IN LATVIA / SUMMARY 5 > STAKEHOLDER MOTIVATING AND COMMUNICATION WITH THEM
The implementation of energy projects in all communities is based on communication and mutual trust. When you start promoting a project idea, use face-to-face ...

European Energy has secured EUR82 million in financing for a 148MW solar farm in Latvia, which will be the largest in the Baltics. The project is expected to provide power to ...

Niam and Evecon will deploy 84MW of solar power and 26MW of energy storage across 11 project sites in Latvia. Image: Niam Infrastructure. News from the Nordics and the Baltics, with BESS projects launched in Sweden, Denmark and Latvia by Centrica, Nordic Solar and Niam Infrastructure and Evecon.

Solar energy projects in Latvia

European Energy has secured EUR81 million in financing for a 148-megawatt (MW) solar park in Latvia, marking a significant step in the country's renewable energy expansion. ...

A lot of financial resources are needed for this task, and we are satisfied that NIB sees a great potential in this endeavour," says Jens-Peter Zink, Deputy CEO of European Energy. About European Energy. The solar farm project is developed by European Energy. European Energy is a global renewable energy developer with projects in 25 countries.

A render of one of two BESS projects that Evecon and Corsica Sole will build in Estonia. Image: Evecon. Bids have been received by Latvia's grid operator AST for an 80MW/160MWh BESS project while developers Corsica Sole and Everon will build a 200MW system in Estonia, as the Baltic region prepares to decouple from Russia's electricity system in ...

Producing green energy for a cleaner tomorrow Evecon develops wind, solar and energy parks in Estonia, Latvia and Lithuania Development project volume 1500 GW With this, we cover the annual energy needs of 540,000 households. Learn more about the projects Solar parks developed 10 750 MW in the 2026 development plan On-shore wind farms 1

Danish renewables firm European Energy has secured EUR68 million (US\$73.4 million) in financing for a 148MWp solar PV plant in Latvia. Developed by its subsidiary, Stelo Orienta SIA, European...

Due to the technological development and the possibility of selling the generated electricity without state-aid, which has been historically an issue due to feed-in tariff support scheme, last year was a turning point for the renewable energy industry in Latvia transforming it from an industry, in which the implementation of projects was hindered by the complicated ...

The most common renewable energy sources in Latvia are biomass and hydropower. There is a considerable potential to further develop wind power and solar energy, and this sector is growing considerably in the region. To boost economic growth and mitigate the effects of the Covid-19 crisis, entrepreneurs also have access to several support

The Nordic Investment Bank (NIB), Luminor Bank, and NORD/LB will co-finance a 148-MWp solar power project developed by Denmark's European Energy in Latvia, a joint press release said on Thursday.

So far, Latvia has lagged far behind its neighbors in the construction of solar energy parks. In 2023, Estonia's solar power capacity reached 822 MW, Lithuania's - 1165 MW, while Latvia's was only 500 MW. "We are delighted to see the growth of renewable energy projects, which not only enhance our nation's energy security

by reducing ...

By building solar farm projects in Kuldiga, Tukums and Bauska municipalities, the company will be able to provide green energy to almost 200,000 Latvian households. "We are actively working on the construction of our projects in Latvia and plan to start producing and supplying green energy to the grid from solar power plants in Latvia as ...

Today, over 3% of U.S. electricity comes from solar energy in the form of solar photovoltaics (PV) and concentrating solar-thermal power. The United States solar energy market is expected to grow at an annualized growth rate of ...

Ignitis Renewables, an international green energy company, is expanding its operations in Latvia. The investment decision foresees an investment up to EUR 106 million in the development of the 174 megawatt ...

The Nordic Investment Bank (NIB), Luminor Bank, and NORD/LB will co-finance a 148-MWp solar power project developed by Denmark's European Energy in Latvia, a joint ...

Latvia had 56 MW of cumulative solar capacity by the end of last year, with the majority, 49 MW, deployed in 2022, according to the International Renewable Energy Agency (IRENA).

Collectively, these projects represent a significant investment in renewable energy infrastructure, aiming to generate clean and reliable power while reducing greenhouse gas emissions. Our four recently initiated PtX projects are a logical outcome of renewable production initiatives in Latvia, enabling a predictable flow of electricity production.

These projects in Latvia are pivotal for our progress towards our goal to install 4-5 gigawatts (GW) of green generation capacities by 2030," he stated. This portfolio comprises three separate solar power plants in Latvia, a 94 MW Varme solar project and a 145 MW Stelpe solar project, consisting of two stand-alone developments.
