

Tool Battery Storage

Can you store a power tool battery in a garage?

Yes, lithium-ion and nickel-cadmium batteries, for instance, have different optimal storage conditions, which we delve into in our guide on [How To Store Power Tool Batteries](#). Is it safe to store batteries in the garage? As long as it's a dry and temperature-regulated environment. However, extreme cold or heat can damage the battery.

Do you need a storage case for power tool batteries?

While not mandatory, a storage case protects batteries from environmental factors, and accidental contacts, and ensures an organized layout. Navigating the intricacies of [How To Store Power Tool Batteries](#) is no longer a maze of confusion.

How do you maintain a power tool battery?

Remove the battery from the tool after use and store it separately. Periodically check the charge level every 3 to 6 months and recharge them if needed. Make sure 2 LEDs are lit on your battery before storing. Use a damp cloth to clean the dust and soil off the batteries as dirt accumulation can affect their performance.

Should you leave batteries inside a power tool?

While leaving batteries inside the power tool might be convenient, long-term storage might not be advisable. The tool may unintentionally draw power from the battery or expose it to different environmental conditions.

Are power tool batteries corrosive?

It's often a mix of dirt and minor corrosion. But when batteries cozy up to corrosive materials, the damage can be far more severe. For the best practices on maintaining the life of power tool batteries, Grainger has the 411. With the right love and care, your batteries can continue to [How To Store Power Tool Batteries](#) effectively.

Which battery is best for a power tool?

When it comes to power tool batteries, the most common contenders are Lithium-ion (Li-ion) and Nickel-Cadmium (Ni-Cd). Lithium-ion vs Nickel-Cadmium: Li-ion batteries are the Usain Bolts of the battery world - lighter, higher capacity, and they can handle a lot more charge cycles than Ni-Cd.

I recently partnered up with The Home Depot through their Prospective program to review some of the new 20v MAX with Flexvolt Advantage tools.
