The Fixed Storage and Energy Transfer Device are devices used to power Energy Transfer Terminals in Fontaine in Genshin Impact 4.1. Learn about Fixed Storage and Energy Transfer Devices, as well as how to use them! What are the Fixed Storage and Energy Transfer Devices?

How do I activate all the energy storage terminals?

So, let's see what steps you need to take to activate all the terminals: Research Terminal #1: Take the first Energy Storage Device and move forward and to the right. You'll have practically no other options, so you'll know where to go right away.

How to pick up energy storage devices?

The order in which the barriers should be dealt with is as follows: first the right barrier, then the left barrier, and finally the one positioned in the middle. First, approach one of the Energy Storage Devices and select the option to Pick Up. Hastily proceed straight ahead and make a right turn.

What is a fixed storage device?

Fixed Storage Devices are energy storage units that are commonly seen near Energy Transfer Terminals and allow energy to be transferred from storage devices to them. They can easily be classified due to how their bases are fixed to the ground. Unlike the Fixed Storage Device, these can be picked up and placed anywhere within a limited area.
