What is a pure sine wave grid tie solar inverter?

A 25kW pure sine wave grid tie solar inverter is a brand new on grid inverter for 3-phase 4 line solar systems. It has two high efficiency MPPT that convert an input voltage range of 200-820V to a 208-480V output. This inverter offers many advantages, including a compact size, long service life, easy installation and maintenance, and competitive prices.

What are the advantages of MPPT inverter?

A 25kW Three Phase Grid Tie Solar Inverter with an MPPT inverter offers advanced MPPT tracking technology and a wide MPPT voltage range. Its no isolation transformer H6 full-bridge configuration results in a highest efficiency of up to 97%. It also provides over voltage, short circuit, overload, and overheating protection, as well as anti-islanding protection. Multiple inverters can be operated in parallel. The LCD display enables users to conveniently monitor main parameters.
