

Waterproof UPS Uninterruptible Power Supply

Does upspro support small?

Support small. Learn more The UPSPro series outdoor systems are designed for applications that require a backup power source in order to maintain uninterrupted service in the event of AC power failure. The system is powered over a CAT5 network cable via Power over Ethernet (PoE) using a Power Supply and PoE Inserter (included).

How does an uninterruptible power supply work?

The uninterruptible power supplies have e.g. an adjustable maximum buffer time to protect the battery and the unit protects the battery from going into a deep discharge. Draining the battery all the way down can damage it in a very short period of time, especially if this occurs multiple times.

What are outdoor UPS?

Outdoor UPS are rugged back-up power supply systems that are designed to weather the elements in harsh outside locations.

What is a continuous power supply (UPS)?

UPS is the short version of "uninterruptible power supply". In many applications a continuous power supply is important because power fluctuations and outages can cause damage to control equipment as well as unexpected down time. This situation can lead to a loss of productivity and revenue.

What are UPS modules with capacitor storage?

UPS modules with capacitor storage are equipped with integrated electrochemical double layer capacitors. In case of a power fault they guarantee an uninterrupted power supply for several seconds. By using such UPS modules, processes can be completed and data saved, for instance.

What is an UPS system & how does it work?

These UPS systems are custom engineered to provide clean, uninterruptible back-up power and protect sensitive electronic equipment in harsh climates. Each component of these systems contributes to its hardness, reliability and functionality.
