

Western Europe EK launches outdoor power supply

Can external power supplies be tested under Regulation (EU)2019/1782?

Products containing external power supplies (e.g. USB sockets) which would need to be extracted from the main product and rewired for testing, cannot be tested under Regulation (EU)2019/1782, as there are no standards or methodologies describing such operation. In such situation the Regulation cannot be enforced.

Is there an energy labelling regulation for external power supplies?

No, there is no Energy Labelling regulation for External Power Supplies. Does the Ecodesign regulation for External Power Supplies require the 'Common Charger' for certain products?

Which products fall under the scope of EPs?

Products containing external power supplies (e.g. USB sockets), for which the functions of the main product apart from the EPS can be fully disabled by user operation (e.g. a table luminaire with a mechanical on/off switch), fall under the scope of .

Does the Ecodesign regulation for external power supplies require the 'common charger'?

Does the Ecodesign regulation for External Power Supplies require the 'Common Charger' for certain products? The 'Common Charger' is a universal interoperable (USB) power supply which is for the time being required only under the Radio Equipment Directive to be used with mobile equipment like smartphones, tablets or laptops.
