

What is an uninterruptible power supply (UPS)?

Home &#187; Electronics &#187; Uninterruptible Power Supply (UPS) Types A UPS system consists of a rechargeable battery, a rectifier and battery charger, a static inverter, and a power transfer switch. Two types of UPS systems exist: double- and single-conversion UPS systems.

How many UPS & battery systems have been installed in Switzerland?

More than 30,000 UPS and battery systems have been successfully delivered, installed and are in operation at more than 3,000 clients in more than 100 countries. This success is based on traditional Swiss values that focus on technical excellence and quality in all areas of operation. We welcome you to be part of it.

What makes INVT UPS power supply unique?

INVT UPS power supply is the leading all-digital power product, which has integrated the most advanced technology achievements in power electronics and automatic control fields with nearly 30 patents.

What is the highest capacity of the offered UPS?

The offered UPS have a capacity range of 1-400KVA. Single phase 1:1 Online Tower & Rack UPS, capacity range 1-20KVA; & Three phase 3:1 Online Tower UPS, capacity range 10-40KVA; Featu... with high performance and reliability. fully DSP controlled and PFC technology to provide reliable power...

Why should you choose an IFP series ups?

It is ideal for PC users or small business companies, as well as for small telecom applications. The iFP series is equipped with AVR to reduce the impact of unstable voltage on equipment. The intelligent UPS' functions can also provide power during outages, and the battery automatically charges when power is restored.

What is the capacity range of a 3 phase UPS?

INVT offers three phase 3:3 Online Standalone Tower & Rack UPS with a capacity range of 10-500KVA. Additionally, their System Cabinet UPS also has a capacity range of 10-500KVA.

FP Series UPS provides stable and reliable power protection. It is ideal for PC users or small business companies, as well as for small telecom applications. The iFP series is equipped with AVR to reduce the impact of unstable voltage on ...

In times of increasing relevance of decentral power supplies and decreasing reliability of the power supply networks, uninterruptible power supplies (UPS) become more and more important. Especially for applications which are safety critical, applications with a high requirement concerning the plant availability, lighting systems e.g.
