Customer satisfaction is our ultimate goal and the common development with our customers is our rigid pursue. What is Aluminum Solar Panel Frame?

Why are aluminum panels used for solar panels?

Extruded aluminum profiles are usually used for solar panel frames and solar mounting system, because aluminum extrusions have high strength, light weight and strong corrosion resistance. The aluminum frame seals and secures the solar cell module between the glass cover and back plate, ensuring structural stability and extending battery lifespan.

Targray's portfolio of aluminum solar panel frames is a trusted source for PV module manufacturers seeking superior mold sophistication at a competitive price. Produced in a state-of-the-art production facility, the solar frames we supply are molded and assembled using high-precision tools ($\pm 0.02\text{mm}$ variance) to ensure reliable performance and ...
