

# Major energy storage project in El Salvador

Why is the El Salvador power project important?

The power project, which began taking shape in 2013, is important for El Salvador because it offers cleaner energy production, replacing heavy fuel oil for power generation while offering flexibility the country needs to support the addition of more renewable energy resources to the national power grid.

What is a 378-megawatt energy plant in El Salvador?

Located in the Municipality of Acajutla, Sonsonate, the 378-megawatt project is an LNG-to-power facility that will supply approximately 30% of the energy demand of El Salvador and contribute to the diversification of the country's energy mix through new clean energy generation and reduced reliance on heavy fuel oil and imported diesel.

Why is El Salvador a big importer of electricity?

El Salvador currently imports about one-quarter of the country's total electricity, making it the largest importer of electricity in Central America. Government officials have said the heavy reliance on imported power creates energy security risks, along with providing an economic challenge.

Will EDP introduce a new source of thermal energy to El Salvador?

EDP will introduce a new source of thermal generation to El Salvador through power purchase agreements with seven of the country's distribution companies.

How much money will EDP bring to El Salvador?

The transformative infrastructure project brings approximately \$1 billion foreign direct investment for El Salvador. U.S.-based Invenergy is the majority shareholder of EDP and has led the development of the project in partnership with El-Salvador based partners Grupo Calleja, VC Energy de Centroamerica and Quantum Energy.

How does electricity work in El Salvador?

From there, the gas powers 19 internal combustion engines and waste heat feeds one steam turbine. Two 230-kV electric transmission lines, one of which connects to the Central American Electrical Interconnection System, provides added grid reliability to the region and opens further opportunities for renewable energy in El Salvador.

SAN SALVADOR, E.S. (May 12, 2021) - Global sustainable energy developer Invenergy and global liquefied natural gas (LNG) solutions provider BW LNG today announced that they recently closed a \$128.3 million financial package with IDB Invest to finance the special-built floating storage and regasification unit (FSRU) component of the Ener&#237;a del Pac&#237;fico (EDP) LNG-to ...
