Uninterruptible Power Supplies (UPS) (also known as backup power systems) provide emergency power during electrical outages, ensuring continuous operation for critical equipment. Commonly used in data centers, hospitals, and industrial facilities, UPS systems protect sensitive electronics from power surges, voltage drops, and interruptions.

Explore our robust 20kVA Uninterruptible Power Supply (UPS) range, engineered for reliable backup power and superior protection for mission-critical business systems.

The "Best" level of UPS technology, Online battery backup systems provide the highest quality of power protection by incorporating double-conversion technology, whereby power coming into the UPS is converted from AC to DC. Power is then conditioned and converted back to AC at the output of the UPS. Online UPSs eliminates the need to transfer or switch since power runs ...
