

Seychelles electricity UPS uninterruptible power supply sales

Protection from power loss - An Online UPS (uninterruptible power supply) is connected in-line with your server and protects your IT equipment and systems when power is lost. In the unfortunately event of mains failure, the UPS will automatically transfer your equipment onto its internal or external batteries until power is restored.

A UPS can protect against a variety of power failures or poor electrical quality caused by the power grid or installation environment: Power outage - blackout is an electric power loss in a given area or section of a power grid. It could affect a single building or an entire city, depending on the extent of the damage or cause of the outage.
