

Tunisia goes to outdoor power

What drives Tunisia's energy transition?

Three key drivers will dictate Tunisia's energy transition: energy security, given Tunisia's growing energy balance deficit; economics, given the relative decrease in the price of renewables; and environment, given the Country's commitment to reduce domestic greenhouse gas emissions.

How much energy does Tunisia generate?

Source: IRENA. According to Global Energy Monitor, Tunisia has a generating capacity of 6,079 MW total, comprised of oil and natural gas (5,771 MW), solar (55 MW), and onshore wind (253 MW). In 2022, Tunisia increased its renewable energy target to 35% of total energy generation by 2030.

Why does Tunisia need more electricity?

As one of the most climate vulnerable Mediterranean countries, Tunisia's electrical system is expecting increased demand resulting from expanding peak-hour demand patterns, intensifying cooling needs stemming from greater warm spells, and increasing desalination needs.

Is Tunisia a good place to invest in wind energy?

Financing Wind Energy Development: Tunisia has a good reputation with international finance institutions and coupled with a robust renewable energy framework the environment is favorable for private sector and foreign direct investments in wind energy.

Why is wind power important in Tunisia?

Wind power (WP) has the potential to impact the achievement of renewable energy targets due to the country's favorable geographic location. Furthermore, Tunisia has the potential to implement viable wind energy projects that satisfy fundamental economical profitability (Georgiou et al., 2008).

Can offshore wind power be used in Tunisia?

Offshore wind power has the potential to play a key role in achieving the future renewable energy targets due to the country's favorable geographic location and coastline. However, there are currently no offshore wind farm projects nor experiences in Tunisia.

You will discover the history of the town that goes back to ancient Carthage and the different civilizations that passed through until the modern times. We will pick you up from any hotel in the town, ride across the touristic zone, the city center, the old town (Medina), go up to the marine cemetery and visit the old sea port.

Jay Ramesh The Arab Spring started in Tunisia almost 11 years ago. Today, many of its citizens complain that their situation remains largely unchanged. It's the same defective economic and political system under a different name. An abject lack of political and human rights, coupled with a stagnat

Tunisia is a safe travel destination for tourists. In general, crimes against travelers and foreigners are low. The authorities have improved security in tourist resorts and major cities and their ability to respond to potential safety hazards. Also, crimes against tourists are punished harshly.

The Kairouan Solar Project, Tunisia's first large-scale solar initiative, significantly boosts the country's renewable energy capacity by providing 100 MW of solar power to the national grid. This initiative, part of ...

Tunisia needs to encourage investment in waste-to-energy projects in order to tackle a massive power supply gap of nearly 60 percent, an energy official was reported on ...

Tunisia After securing 500 MW solar plans, Tunis is ready for 1200 MW more. After two years of talks, Scatec, Engie and the consortium TBEA-AMEA Power are at last on track to start construction of five solar farms totalling 500 MW, on top of which Mechichi's government wants to already add a further 1200 MW in solar and wind power.

On the plus side, Tunisia's parliamentary elections passed in October with much to be positive about. It was, to a large extent, calm, and more than 60% of registered voters chose to take part.
